

The Warner Bathroom

Before

“The new design looks as though it has been there for years. In other words, the design looks as though it should have been that way 20 years ago when we had the house built. It all fits in functionally, comfortably and beautifully. Thank you for your vision and for listening to us and becoming familiar with our likes and dislikes. You incorporated things we didn’t think we would ever be able to do. You have amazing listening skills and your design was truly brilliant.” Dusty Warner
